Classroom Observation 3:  
One Child

Follow one child for 1 hour. **Record** what the child does in five-minute intervals. **Record** only behaviors you see and hear. Don’t make any judgments or interpretations as you describe the behaviors.

After the Observation:  
What information did you gain that would help you match the child with specific materials and activities?

What did you learn from this observation that will benefit you in your classroom with your children?
